### Consider a customized package of coaching and workshops, like these schools and districts:

#### Holub Middle School, Alief ISD

Math and literacy specialists participated in weekly coaching in content and leadership.

School specialist says: "My coach's willingness to first learn about me and my environment and then coach in the way that WE NEED has not only been appreciated, but it's in alignment with best practices across teams and in classrooms."

#### Spring ISD

Leadership Academy across the school year for Principals and Direct Supervisors.

Participant says: "This group keeps me going. So much work but good work-learning so much. All good. Going to use what we learned today before our next meeting."

#### Attucks Middle School, Houston ISD

Reading/Writing coaching.

Teacher says: "Houston A+ was perhaps the best thing to happen to my campus this year. Their approach on teaching and reading strategies was a great benefit in my classroom. They not only offered strategies, but they also modeled how to implement those strategies. I am thankful for their service this year!"

#### KIPP Houston

Regional PD with 6<sup>th</sup> grade math teachers.

Secondary Director of Mathematics says: "Through a partnership with Houston A+ we have seen improved instruction in the classroom. Instead of focusing on test prep teachers are helping guide students to a deeper conceptual understanding of mathematics content that will support student success on STAAR but more importantly in future math classes."

*As a non-profit organization, Houston A+ Challenge offers competitive pricing.*
